Image Scanner

RICOH fi-8930 Datasheet

☑ Scanner

Unlock work efficiency with ultra-fast scans to endure daily duties

- High speed and volume scanning to endure daily duties
- Unlocking work efficiency of job operators
- Usability-first design for smooth operation

Enhanced productivity, ideal for large daily duties

The fi-8930 achieves a scanning speed of 130 ppm/260 ipm (A4 landscape, color, 200/300 dpi), and is highly optimized for centralized scanning.

Increase work efficiency with exceptionally accurate feeding

Offering two novel functions, the scanner realizes stable paper feeding performance, even for high-volume scanning with a mixed batch. Automatic Skew Correction corrects the skew of documents one by one before feeding. To prevent stapled documents, which are easy to overlook from being damaged when batch scanning, Stapled Documents Detection detects stapled documents regardless of where the staple position is and stops document feeding immediately.

Designed to prioritize operator usability

The scanner can handle a wide variety of documents. The Dual Path Mechanism enables switching of the ejecting paths. Documents up to 1.25 mm, such as cardboard envelopes can be scanned with Straight Scan, while the U-turn Scan enables continuous scanning for standard documents. Manual Feed Mode scans bi-folded and multi-layered documents as is.

The paper ejection control after scanning has been well-improved. Even when scanning at higher speed, documents are neatly stacked in order, since the scanner quickly controls the paper output speed by identifying each document's size and position. With the improved ejecting abilities, even folded or curled documents, which tend to cause paper jams at the paper outlet, are handled smoothly. Operators can collect scanned documents without fuss or hassle.

The scanner also comes with a 4.3-inch touch screen for easier operation, and it supports LAN and USB 3.2 connectivity.

Effective data utilization combined with the PaperStream Series

The scanner driver, PaperStream IP, automatically produces clear image data and supports OCR accuracy. The powerful capture software PaperStream Capture efficiently feeds information into organization workflow by automatically utilizing data extracted from barcodes and zonal OCR, further streamlining mundane tasks.

RICOH fi-8930

Technical Information

rechnical information			
Scanner Type	ADF (Automatic Document Feeder)/Manual Feed,		
	Duplex		
Scanning Speed*1			
(A4 Landscape)	Simplex: 130 ppm (200/300 dpi)

*1 Scanning speeds may vary due to the system environment. For details, please visit our website at: https://www.pfu.ricoh.com/global/scanners/fi/. *2 Indicated speeds are from using JPEG compression. *3 Indicated speeds are from using JIFF CCITT Group 4 compression. *4 When scanning in high resolutions (600 dpi or above), scanning may be rejected depending on scanning mode, document size, memory size, and application program. Selectable maximum resolution may vary depending on the length of the scanned document. *5 Limitations may apply to the size of documents that can be scanned, depending on system environment, when scanning at high resolution (over 600 dpi). *6 The maximum document length for long page scanning depends on the resolution: 5,461 mm (215 in.) for up to 300 dpi, 4,064 mm (160 in.) for up to 400 dpi, 863.6 mm (34 in.) for up to 600 dpi, and 431.8 mm (17 in.) for up to 1,200 dpi. *7 Scanning of documents from 209 to 256 g/m² (56 to 68 lb) is supported only when the temperature is 25±5°C (77±9°F) and humidity is 50±10%. *8 Maximum capacity depends on paper weight and may vary. *9 Numbers are calculated using speeds and typical hours of scanner use, and are not meant to guarantee daily volume or unit durability. *10 With the ADF hopper closed. *11 fi Series scanners do not run with Windows 11 and 10 ARM-based PCs. *12 Functions equivalent to those offered by PaperStream IP may not be available with the WIA Driver. *13 Refer to the fi Series Support Site for driver/software downloads and full lineup of all supported operating system versions. *14 Replacement cycles are guidelines for using A4 documents (80 g/m² [20 lb]). These cycles vary depending on the type of documents scanned, how often the scanner is used and cleaned, and your operating environment.
